As your productive day is complete  
Take that weight off your feet  
And feel the swirling waters touch your skin  
Knowing your efforts resulted with a win

The filled bath waters are waiting to get you wet

The soothing sound of bubbling water  
Is so sweet what more can matter?  
This relaxing feeling brings a smile to enjoy  
And tomorrow another day will employ  
Another hard earned satisfying result

Bathrooms were first called an “outhouse” only serving one utilitarian purpose and located away from the home. With the advent of indoor plumbing came the bathroom. It still had a single task, then came the sink and now has expanded incredibly into a dazzling area as all of life around us has.

Bathrooms have always satisfied many functional needs and now fulfill many aesthetic desires. There is a lot more to a bathroom now than just presenting us to be seen clean.

The basic bathroom includes a toilet, sink, bathtub or shower stall, exhaust fan, medicine cabinet, tile floors and walls surrounding the tub or shower fitting into a small 5 x 8 space.

Bathrooms and mainly the master bath suite have evolved into the second outstanding feature in a home. The master bath encompasses privacy to unwind, relax and reflect on all the positive aspects of your productive day while serving to your body’s vital maintenance.

Many pleasures are experienced in the privacy of your bathroom and aiding is an intended larger bath space showcasing elaborate designs and available plumbing fixtures.

The population is now thrilled and pampered to indulge in the miracle abilities of warm controlled water touching and covering every inch of your body.

These water controlled valves exhibit cutting-edge technology to offer an extraordinary water experience especially in showering. In bathing you still fill the tub, relax and push the start button.

Plumbers now need to enroll in courses to learn the installation process of all the complicated necessary piping to ensure the intended water sequences flow properly.

There exists a shower system that you can program with a keypad to do:

- Regulate spray patterns
- Decide on spray zones
- Decide different water temperatures
- Decide on body sprays sequencing
- Decide on if you desire a rain head or a shower head or body sprays

The modern bath has evolved throughout the years to include many conveniences and ambiances:

Single handle, touch less and wall mounted faucets, water saving, self-cleaning, heated and a self-closing seat, and wall mounted toilets, bidets, on demand tankless water heater (thus reducing water consumption), radiant heated floors, shower enclosure with seat, hand held shower head, stone countertops, towel warmers, steam showers, lighted mirrors, free standing tub, whirlpool tubs and showers with rhythm, skylights, video screens, stereo sound, cathedral ceilings, pre-fab fireplace, mini-refrigerator, sound insulated walls, pull out coffee maker, stacked washer dryer, and a balcony. The master bath ....a comfy place to relish some quality tranquil time in !!
